

Title of work: Saturn on a Very Good Day

Artist Statement (specific to my creation):

Shakespeare and other authors of centuries past knew Saturn as the God of melancholy and winter. "Saturn on a Very Good Day", however, in title and affect, continues in the playful vein of a painting that I created this past spring, a response to the long winter we were experiencing. "Saturn on a Very Good Day" is packed with O's, orbs and little white flowers. Lately too, I have been experimenting with glittery glues and paints, contemporary materials not available in Shakespeare's time. The buyer of this painting may choose to hang it in whichever orientation pleases them most; there is no right way nor wrong way to hang it.
