

My image was created out of my love and fascination with the future and science fiction illustrations of the past. I was always drawn to how people interpreted their ideas of what the future might look like back in the 50s and 60s. Moving forward with that same notion, I too sometimes like to explore my idea of what the future might look like or at least just have fun drawing space people and what not. Who wouldn't love to jump and fly around with a jet pack. I certainly would. I used ink and acrylic to try to emulate they type of work I normally do on a commercial basis. I'm heavily influenced by drawing of any kind and especially that of comic books and other figurative illustration from the 40s, 50s, and 60s.
